DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 24-30 and 60-80 are rejected under 35 U.S.C. 102(e) as being anticipated by CRAGG (5,665,115).

As to claims 24-30 and 60-80, CRAGG (Fig. 1-9) discloses stent 10 of a low memory material such as stainless steel, gold, tantalum (col. 2, lines 59-62) or high shape memory alloy nitinol (col. 2, lines 55-56) including self-expandable loops 11 and connector elements 12 of plastic (claim 4) and PTFE graft 13 (col. 3, lines 21-22). CRAGG stent 10 has loops 11 of either stainless steel or nitinol and connector elements 12 of plastic, therefore CRAGG stent meets all limitations as recited in the claims.

Response to Arguments

The amendment and remarks filed on 11/3/2003 under 37 CFR 1.131 has been carefully considered but is moot in view of the new ground of rejection based on new reference CRAGG (5,665,115).
